Stanley will attempt to fill orders in the order in which they are received, subject to prior orders. However, Stanley reserves the right to allocate orders or fill an order or orders ahead of prior orders, if, in its judgment, the facts warrant such a change.

Any additional provisions in a Purchase Order, including any pre-printed terms, shall be void and not binding on Stanley, unless expressly accepted by Stanley. The permanent masterkeyed cores are shipped directly to the end user upon written approval of the final keying. It is the responsibility of the Distributor to collect all temporary construction cores after use.

PROCESS:

1) Distributor places complete order with Stanley Customer Service, Indianapolis
2) Distributor, KSS, and End User Consultant (EUC) receive acknowledgement of order with expected ship date.
3) KSS/Distributor contacts the end user within a reasonable period of time after receipt of purchase order or acknowledgment to begin the permanent keying process.
4) KSS/Distributor works with end user to define keying requirements.
5) Once keying requirements are finalized and approved, production of cores and keys begins.
6) Cores and keys are shipped to end user or end user delegate (note: unless special arrangements are made the end user is responsible for permanent core installation).

Complete Order Checklist

- PO Number
- Hardware Schedule
- Completed Keying Request Information Form

The KSS/Distributor works directly with the end user to acquire keying instructions for the permanent masterkeyed cores and keys, including both new system design and existing system expansion, according to the project requirements. The KSS/Distributor also manages the process from keying instructions to delivery and can serve as a point of contact for information on the progress of permanent core/key delivery completion.

STANLEY BEST ORDERING (continued)

SERVICE DELIVERY:

Permanent Core delivery is contingent upon several factors such as:

- The negotiated delivery dates as determined between the end user, Distributor and Stanley during the keying review and design processes;
- End user's written approval of the keying instructions;
- Size and complexity of the keying system being produced; and
- Stanley's receipt of payment from the Distributor.

GENERAL:

- Remember to furnish door and location information for all "tag-in" orders (add-ons to initial project orders)
- If you have advance knowledge that your project will be phased and require multiple orders from Stanley, please include these details in your order.
- A master hardware schedule for phased projects is always preferred.

CONSTRUCTION CORES

CONSTRUCTION CORE ORDERS: All keyed locks shipped from Stanley for new construction projects in which cores have been ordered will receive disposable black plastic (non-keyed) construction cores at no additional charge.

Disposable black plastic cores for less-core orders may be purchased separately for $1.50 net.

Standard brass (keyed-alike) construction cores may be purchased for a net price of $8.00 each.

No further discount will be applied.

When increased security is needed please contact your local Stanley Sales Representative.
